

Fun With Numbers

Candle Burning MATHEMATICS

1. First of all, write down a number for the times a week you burn any of our fabulous PL candles. (More than once but less than 10)
2. Multiply your number times two (2) (Just double it to be bold)
3. Next, add five (5) to your number.
4. Now, multiply your number by 50! - I'll pause while you get your calculators!
5. Now, pay attention! If you have already had your birthday this year add 1753 to your total! If you have not had your birthday yet, add 1752!
6. Finally, subtract the four-digit year that you were born.

Does everyone now have a "Three-digit" number?

OK, the first digit of this is your original number! (How many times a week you burn our PL candles each week.)

The next two numbers, amazingly are;

YOUR AGE! (Oh YES, it IS!)

THIS IS THE ONLY YEAR (2003) IT WILL EVER WORK. IMPRESSIVE, ISN'T IT?
